

FLORIDA

Premium DMV Cheat Sheet

Initial Steps

1. If applicable, complete a Traffic Law and Substance Abuse Education Course.
2. Schedule an appointment at a Driver License Service Center.
3. Provide required documentation.
4. Provide medical information.
5. Take a vision screening test.
6. Take a hearing screening test.
7. Pass the written knowledge exam.
8. Pass the driving exam.

Required Documentation

Documents should be valid/unexpired originals or certified copies

1. Primary Identification Document
2. Proof of Social Security Number
3. Two proofs of Residential Address
4. If applicable, Immigration Documents
5. If applicable, Legal Name Change documents
6. If applicable, a Medical Report Form

Fees

- \$48 for a Class E Driver License
- \$25 for a replacement Driver License
- \$10 to retake the Written Exam
- \$20 to retake the Driving Exam

Languages

- Knowledge exams are available in English, Spanish, and Creole.
- Language interpreters are permitted to accompany applicants during the driving exam.
- When scheduling an appointment, indicate if you will need an interpreter or if you will be bringing an interpreter.

Knowledge Test Information

- All questions on the written knowledge exam are taken from information found in the Florida Driver Handbook.
- The exam consists of 50 multiple-choice questions. You must correctly answer 40 questions to receive a passing grade.
- For the exam, you will be expected to know a variety of information, including Florida traffic laws, safe driving practices, and traffic controls.

Top 150 Questions & Answers

1. Permitting an unlicensed person to drive can result in:

> **A 60-day jail sentence and a \$500 fine.**

It is illegal to permit or authorize an unlicensed person to drive a motor vehicle. Doing so can result in a 60-day jail sentence and a \$500 fine. If the vehicle is involved in a crash resulting in bodily injury or the death of any person, the person who permitted the unlicensed person to drive shall have his/her license suspended for one year.

2. When should you adjust your mirrors?

> **Before turning on your engine.**

When preparing to drive, you should be sure all of your equipment is in working order. Before starting your engine, adjust all mirrors so that you can use them without having to lean forward or backward.

3. Before switching on the ignition, you should:

> **Be sure all of the vehicle's occupants have buckled their seat belts.**

Develop a routine for entering and leaving your car. Before switching on the ignition, buckle your safety belt and see that all passengers do likewise.

4. Posters, signs, and stickers on the windshield and windows:

> **Are prohibited, unless they are otherwise specifically required by law.**

Obstructions on windows are prohibited. No sign, poster, or sticker may be placed on any window of a vehicle, unless it is specifically required by law to be on a vehicle's window.

5. When a vehicle with an Anti-Lock Braking System starts to lose traction on a slippery road, drivers should:

> Press and hold the brake pedal.

If their vehicle loses traction on a slippery road, a driver with an Anti-Lock Braking System (ABS) needs to press down hard on the brake pedal, hold it, and steer out of danger. In an emergency situation, the ABS automatically pumps the brakes at a faster rate than the driver could. Removing steady pressure from the brake pedal or pumping the brakes will disengage the ABS.

6. If worried, nervous, angry, or crying, a driver:

> Should take the time to focus on driving before starting the engine.

You may not be able to drive well if you are worried, excited, crying, angry, or depressed. Emotions can distract you from your driving because your mind is focused on something else. Take time to calm down and get focused before driving.

7. When encountering an aggressive driver, you should:

> Avoid eye contact, slow down, and let them pass.

If another driver is threatening you or intentionally driving dangerously around you, remain calm and try to put as much distance between the two of you as possible. Slow down and let them pass. Do not make eye contact and do not make obscene gestures.

8. Distracted driving is:

> Extremely risky behavior.

Distracted driving is extremely risky behavior that puts not only you and your passengers in danger, but also endangers pedestrians, bicyclists, and other motorists sharing the road. Focused attention on driving helps to prevent crashes.

9. While operating a motor vehicle, drivers are permitted to text:

> **Under no circumstances.**

It is illegal in Florida to operate a motor vehicle while texting. In 2014, there were over 1,600 citations issued for texting and driving.

10. If you are driving in the left lane and a vehicle behind you is operating at a higher speed:

> **You are required by law to move out of the left lane.**

Florida Law states that a driver must move out of the left lane when being overtaken from behind by another vehicle traveling at a higher rate of speed. Safely merge into a different lane.

11. How long will a DUI conviction remain on your driving record?

> **75 years.**

Because drinking alcohol and driving is so dangerous, the penalties are very tough. People who drive after drinking risk heavy fines, higher insurance rates, loss of license, and jail sentences. A DUI conviction will remain on your driving record for 75 years.

12. Children are required to wear their seat belts:

> **Anytime they are in a moving car.**

Florida law requires that a fastened seat belt must be worn in all motor vehicles on public roadways by the driver and passengers in the front seat. All children under the age of 18 are also required to wear their fastened seat belts, regardless of where they are seated in the vehicle.

13. A single broken yellow line down the center of a two-lane road indicates:

> **Lanes are moving in opposite directions and drivers are permitted to pass when it is safe to do so.**

Yellow lines are used to separate traffic moving in opposite directions. Dashed lines indicate that drivers directly next to the line are permitted to pass when it is safe to do so.

14. A single broken white line down the center of a two-lane road indicates:

- > **Lanes are moving in the same direction and drivers are permitted to pass when it is safe to do so.**

White lines are used to separate traffic moving in the same direction. Dashed lines indicate that drivers directly next to the line are permitted to pass when it is safe to do so.

15. A solid white line down the center of a two-lane road indicates:

- > **Lanes are moving in the same direction and drivers are not permitted to pass.**

White lines are used to separate traffic moving in the same direction. Solid lines indicate that drivers are not permitted to pass.

16. A double solid yellow line down the center of a two-lane road indicates:

- > **Lanes are moving in opposite directions and drivers are not permitted to pass.**

Yellow lines are used to separate traffic moving in opposite directions. Solid lines indicate that drivers are not permitted to pass.

17. Signs that are colored orange are:

- > **Work zone signs.**

Highway work zones are established according to the type of work underway along the roadway. Signs in work areas are typically diamond-shaped, orange, have black letters or symbols, and serve as a warning that people are working on or near the highway.

18. Guide signs are _____ signs that provide directional and mileage information to drivers.

- > **Green**

Guide signs, sometimes known as destination signs, have a green background and provide directional and mileage information to specific destinations. They can be a helpful resource when driving in unfamiliar locations.

19. Regulatory signs are usually _____ and should always be obeyed.

> **White**

Regulatory signs regulate the movement of traffic. They are usually white with black markings and must always be obeyed by motorists.

20. Pennant-shaped signs indicate:

> **No passing zones.**

Pennant-shaped signs usually indicate no passing zones. Text will also be on the sign to confirm that it is a no passing zone.

21. Pentagonal signs indicate:

> **School zones.**

Pentagonal signs indicate that you are in a school zone. Be extra alert to children and pedestrians when driving near a school.

22. An octagonal sign is always a:

> **Stop sign.**

Octagonal signs are always stop signs. Come to a complete stop when approaching a red, eight-sided sign.

23. A diamond-shaped sign:

> **Warns of existing or possible hazards.**

Diamond-shaped signs warn drivers of existing or potential driving hazards. You will usually see these signs in yellow or orange.

24. When approaching a steady yellow traffic light, drivers should:

- > **Slow to a stop, unless they are already within the intersection.**

A steady yellow traffic light indicates that a red light is about to appear. Stop unless you are already within the intersection.

25. When approaching a steady red traffic light, drivers should:

- > **Come to a complete stop.**

A steady red traffic light indicates that drivers must come to a complete stop. Driving through a red light is against the law and is extremely dangerous. Drivers may turn right on a steady red light if there is no sign prohibiting a turn on red.

26. When approaching a flashing yellow light, drivers should:

- > **Slow down and proceed with caution.**

A flashing yellow light warns of a hazard. Slow down and proceed with caution.

27. When approaching a traffic signal displaying a flashing yellow arrow, drivers:

- > **May turn left after yielding to oncoming traffic and pedestrians.**

A flashing yellow arrow indicates that left turns are allowed in the direction of the arrow. However, the oncoming traffic has a green light and you must yield to oncoming traffic and pedestrians.

28. If a traffic light is out-of-order, drivers should:

- > **Treat the intersection as a four-way stop.**

If a traffic light is out-of-order, drivers should treat the intersection as a four-way stop. The driver who arrives at the intersection first has the right-of-way.

29. If an officer is directing traffic at a working traffic light, drivers should:

> **Follow the directions given by the officer.**

Traffic signals are placed at intersections to keep traffic moving and to help prevent crashes. Drivers, pedestrians, and cyclists must obey these signals, except in instances when an officer is directing traffic.

30. When should you drive in a lane under a lane signal showing a red X?

> **Never.**

Lane use control signals are used when the direction of the flow of traffic in a specific lane changes throughout the day. They are used to show which lanes of traffic are open and closed, as well as to show if toll booths are open or closed. Drivers should never drive in a lane underneath a red X.

31. What do lane signals with a yellow X indicate?

> **The signal is about to change to a red X.**

Lane use control signals are used when the direction of the flow of traffic in a specific lane changes throughout the day. They are used to show which lanes of traffic are open and closed, as well as to show if toll booths are open or closed. When a lane signal contains a yellow X, drivers should clear the indicated lane, as the lane signal is about to change to a red X.

32. When approaching a railroad crossing warning sign:

> **Be prepared to stop if a train is nearby.**

Railroad crossing warning signs are used to warn drivers of the possibility of a train. Drivers should obey all railroad crossing warning signs and never go around barriers or disregard the warning sign.

33. When you see a "Drawbridge" sign and you see a flashing yellow light, you should:

> **Slow down and prepare to stop.**

When a yellow light is flashing near a drawbridge, the drawbridge is in operation. Slow down and prepare to stop.

34. When a drawbridge signal is red, you should:

> **Come to a complete stop.**

If a drawbridge signal is red, come to a complete stop at the marked stop line. The bridge is in operation and the roadway is closed to all pedestrian and motor vehicle traffic.

35. If a gate near a drawbridge is about to lower across the road:

> **Come to a complete stop and wait for the gate to rise before you proceed.**

Many drawbridges have gates with flashing red lights and bells. Stop when the lights begin to flash and before the gate lowers across your lane. Not only is it against the law to drive around or under a crossing gate, it is extremely dangerous.

36. If a flagger is directing traffic in a construction zone, you must:

> **Follow the directions given by the flagger.**

Be prepared to reduce your speed and use caution when directed to do so by a sign, flagger, or law enforcement officer. Failure to do so is illegal and is dangerous to those working in construction zones.

37. What do speed limit signs indicate?

> **The maximum or minimum speed that is legally allowed to be driven**

Speed limit signs indicate the maximum or minimum safe speed that is allowed to be driven on a roadway. The maximum limits are for ideal conditions and you must reduce your speed when conditions require it.

38. The speed limit is _____ in school zones.

> 20 mph

The speed limit in school zones is 20 mph. Use extra caution when driving in school zones.

39. Unless otherwise posted, the speed limit is _____ in municipal, business, and residential areas.

> 30 mph

Unless otherwise posted, the speed limit in municipal, business, or residential areas is 30 mph. If a posted sign indicates otherwise, follow the speed limit on the posted sign.

40. Unless otherwise posted, the speed limit is _____ on streets and highways.

> 55 mph

Unless otherwise posted, the speed limit on streets and highways is 55 mph. If a posted sign indicates otherwise, follow the speed limit on the posted sign.

41. Driving too slowly is:

> Against the law.

Driving too slowly is against Florida law. You must not drive so slowly that you block or delay traffic moving at normal, safe speeds. You should drive with the flow of traffic, within the speed limit.

42. _____ greatly increase stopping distances and severity of crashes.

> High speeds

High speeds greatly increase stopping distances and severity of crashes. The faster you drive, the greater the impact or striking power of your vehicle, should you be involved in a collision.

43. You may legally drive 10 mph over the speed limit:

> Under no circumstances.

Speeding is against the law. You must obey the speed limit and you are responsible for knowing the speed limit when you are driving. The “speeding buffer” is a myth; you are not allowed to drive up to 10 mph over the speed limit.

44. When using a roundabout or rotary island, drivers should:

> Yield to traffic already in the roundabout.

A roundabout is a circular intersection that flows in a counterclockwise direction around a central island and usually does not include a traffic signal. Motorists must enter from the right, yielding to traffic already in the roundabout, and follow the circle to the right until the desired roadway is reached.

45. If two drivers arrive at the same time to an open intersection:

> The driver on the right has the right-of-way.

If you arrive to an open intersection at the same time as a vehicle to your right, you should yield the right-of-way to that vehicle. You may then proceed when it is safe to do so.

46. You may drive in HOV lanes if:

> Your vehicle has two or more occupants.

Some highways reserve the left lane for vehicles with two or more occupants or hybrid/low-emission vehicles. These High Occupancy Vehicle (HOV) lanes are identifiable by signs and diamond pavement symbols and are separated from other lanes by a striped buffer zone. Vehicles may enter and exit the HOV lane only at designated points.

47. When driving in a low-visibility situation, you should:

> Increase your following distance.

Increase your following distance in low-visibility situations. It will be more difficult to see what the car in front of you is doing and you may need extra time to react.

48. Under normal weather and traffic conditions, keep a minimum following distance of:

> Four seconds.

The more distance between your vehicle and others, the more time you have to react to potential hazards. Keep a minimum following distance of four seconds under normal weather and traffic conditions. Increase your following distance during unusual weather or traffic conditions.

49. If you are driving in another driver's blind spot, you should:

> Move forward or drop back so the other driver can see you.

Do not drive in someone else's blind spot. Move forward or drop back so that the other driver can see you.

50. Larger vehicles have:

> Larger blind spots.

The larger the vehicle, the larger the blind spots. Large trucks and SUVs have spots close to their rears that cannot be seen in their side or rearview mirrors.

51. A driver entering interstate traffic from an entrance or acceleration ramp:

> Should yield to drivers already on the interstate.

If you are on an entrance or acceleration ramp and are entering interstate traffic, you should yield to drivers already on the interstate highway. Merge safely into traffic when you are able to do so.

52. If you are driving on the interstate and pass your exit, you should:

> Continue driving and use the next exit.

Don't make a last-minute turn into an exit. If you pass your exit, you must go to the next one.

53. When exiting the interstate, drivers should begin to decelerate:

> **After turning into the deceleration lane.**

When exiting the interstate, you must use the deceleration lane. This lane is designed to allow you to slow down before reaching the exit ramp without being a hazard to other vehicles on the freeway.

54. When may a driver pass a vehicle that is stopped at a crosswalk?

> **Never.**

You are not allowed to overtake and pass a vehicle that is stopped at a crosswalk. Florida law requires that a driver assumes any vehicle stopped at a crosswalk is waiting for a crossing pedestrian, even when none can be seen at that moment.

55. Bicycles on the road:

> **Are considered vehicles with the same rights and responsibilities as motor vehicles.**

Bicycles on the road are considered vehicles and have the same rights and responsibilities as motor vehicles. Drivers of motor vehicles should respect the rights of bicyclists.

56. Motorcycles are entitled to:

> **The same full lane width as other motor vehicles.**

Lane usage for the motorcyclist is critical. Motorcycles are entitled to the same full lane width as all other vehicles.

57. When passing a vehicle stopped on the side of the road, drivers should:

> **Vacate the lane closest to the stationary vehicle or slow down.**

The Move Over Law protects law enforcement officers, emergency workers, tow truck drivers, sanitation workers, and utility workers stopped along roadways while performing their jobs. You must vacate the lane closest to the stationary emergency vehicle, tow truck, sanitation vehicle, or utility vehicle. If you cannot move over safely, you must slow down to a speed of 20 mph below the posted speed limit.

58. When a funeral procession is present, _____ has the right-of-way.

> The funeral procession

Drivers, pedestrians, and bicyclists must yield the right-of-way to funeral processions. When the lead vehicle enters an intersection, the remaining vehicles in the funeral procession may follow through the intersection regardless of any traffic control devices.

59. Florida law requires you to use headlights:

> Between sunset and sunrise.

Florida law says that you must use headlights when driving between sunset and sunrise. Drive with extra care when driving at night.

60. Flashing hazard lights may be used:

> When your vehicle is stopped or disabled on the highway or shoulder.

Flashing hazard lights must only be used if your vehicle is disabled or legally stopped on the highway or shoulder. They may also be used when driving in a funeral procession.

61. Defensive driving is:

> Using safe driving strategies to prevent crashes.

Defensive driving is using safe driving strategies to prevent crashes. Driving defensively means that you are altering your driving to fit the weather conditions, the way you feel, and the actions of other drivers, bicyclists, and pedestrians.

62. If your vehicle begins to skid, you should:

> Turn your steering wheel in the direction you want to go.

If your vehicle begins to skid, remain calm. Steer in the direction that you want to go and try not to overcorrect.

63. Drivers must have a minimum of _____ in both Personal Injury Protection (PIP) insurance coverage and Property Damage Liability (PDL) insurance coverage.

> \$10,000

According to Florida's No-Fault Law, every owner or person in charge of operating a motor vehicle in Florida must provide proof of valid PIP and PDL insurance at the time of vehicle registration. They must have a minimum of \$10,000 in PIP coverage and a minimum of \$10,000 in PDL coverage.

64. If you are driving and are 21 years old or older, you are considered to be driving under the influence when your blood alcohol concentration (BAC) is a minimum of:

> 0.08 percent.

A driver with a blood alcohol concentration (BAC) of 0.08 percent or higher is driving under the influence. Conviction of driving under the influence may result in a fine, imprisonment, or both.

65. If you are convicted for driving under the influence and it is your first conviction, you may be subjected to:

> A fine, community service, jail time, DUI school, license revocation, and an Ignition Interlock Device.

Penalties for the first conviction of a DUI may include a fine, community service, imprisonment, license revocation, and the installment of an Ignition Interlock Device. Penalties will increase as the number of DUI convictions increase.

66. Accruing _____ points on your license within a 36-month period will result in suspension of your license for one year.

> 24 or more

Certain offenses committed while driving will count against the driver in Florida's system of suspending driver licenses. If a driver accrues 24 points or more within a 36-month period, their license will be suspended for one year.

67. Fines for moving traffic violations in construction zones are:

> Doubled.

In Florida, fines are doubled when infractions occur within construction zones. There will also be possible civil penalties of up to \$1,000 and you can be required to complete a driving school course.

68. Fines for moving traffic violations in school zones are:

> Doubled.

In Florida, fines are doubled when infractions occur within school zones. There will also be possible civil penalties of up to \$1,000 and you can be required to complete a driving school course.

69. When approaching a flashing red traffic light, drivers should:

> Treat the light like a stop sign.

Flashing red lights are used at dangerous intersections. Treat them like stop signs.

70. When approaching a steady green traffic light, drivers should:

> Continue driving, unless there are vehicles or pedestrians already in the intersection.

When approaching an intersection with a steady green traffic light, yield to pedestrians in the crosswalk and vehicles still in the intersection. You may continue driving, but should approach the intersection at a speed that will allow you to slow down and stop if the light changes before you get there.

71. When approaching a traffic signal displaying a steady yellow arrow, drivers:

> Should slow to a stop, if it is safe to do so.

A steady yellow arrow indicates that a red arrow is about to appear. Stop unless you are already within the intersection.

72. When approaching a traffic signal displaying a steady green arrow, drivers:

- > **May turn in the direction of the arrow after yielding to traffic and pedestrians already in the intersection.**

A green arrow displayed on a traffic signal tells drivers that they may turn in the direction of the arrow. You must be in the proper lane for such a turn. Yield the right-of-way to vehicles and pedestrians already in the intersection.

73. If a crossing guard is directing traffic in a school zone, you must:

- > **Follow the directions given by the crossing guard.**

Be prepared to reduce your speed and use caution when directed to do so by a sign, crossing guard, or law enforcement officer. Always drive with extra caution in a school zone.

74. An "End school zone" sign indicates:

- > **The end of a reduced speed zone.**

Do not exceed the school zone speed limit during indicated times. The end of a reduced speed school zone will be indicated by an "End school zone" regulatory sign.

75. Downward-facing triangular signs:

- > **Tell drivers to yield.**

Downward-facing triangular signs usually indicate that drivers should yield. Once the road is clear of traffic or pedestrians and it is safe to do so, drivers may proceed.

76. Round signs indicate:

- > **Upcoming railroad crossings.**

Round signs warn drivers of an upcoming railroad crossing area. Drivers should use extra caution when approaching a railroad crossing.

77. Crossbuck signs indicate:

> **Railroad crossings.**

Crossbuck signs tell drivers to yield to trains at a railroad crossing. Drivers should not try to outdrive a train.

78. At a four-way stop:

> **The driver to arrive first has the right-of-way.**

At four-way stops, traffic from all four directions must stop. The first vehicle to reach the intersection should move forward first. If two vehicles reach the intersection at the same time, the driver on the left yields to the driver on the right.

79. If towing something behind your vehicle, the drawbar or towing connection:

> **Must be strong enough to pull all the towed weight.**

If a driver is towing something behind their vehicle, they must ensure that the drawbar or towing connection is strong enough to pull all of the towed weight safely. If the towing connection is a rope, cable, or chain, the driver should attach a square, 12-inch white flag. Unless the towed object is difficult to take apart, the towing connection should be no more than 15 feet long.

80. A load extending more than ____ beyond the rear of a vehicle must be marked by a red flag during the day.

> **Four feet**

If a load extends more than four feet past the rear of a vehicle, it must be marked by a red flag when being transported during the day in clear weather. The flag should be 18 inches square. Red lights and reflectors are required when transporting the load in times of limited visibility.

81. If you are required to have increased insurance coverage limits but are unable to provide proof of the increased limits, you will:

> Have your license and plates suspended for up to three years.

Higher insurance coverage limits will be required for a driver who has been convicted of a DUI, accumulated an excessive number of points against their license, or committed a number of other possible infractions. If the driver is not able to provide proof of the higher limits, their license and/or plates may be suspended for up to three years.

82. A driver who has been convicted of three traffic offenses that caused accidents over the course of three years:

> Must complete a DHSMV-approved driver improvement course.

The Three Crashes in Three Years Law requires drivers who have been convicted of three traffic incidents that have caused accidents over the course of 36 months to enroll in and complete an approved driver improvement course. The driver must also complete behind-the-wheel training from a commercial driving school and pass an extended driving test. The requirements must be met within 90 days or the driver's license will be canceled.

83. Exceeding the speed limit by more than 50 mph will result in a fine of _____ for a first offense.

> \$1,000

Exceeding the speed limit by more than 50 mph will result in a fine of \$1,000 for a first-time offense. A second offense will result in a fine of \$2,500.

84. Leaving the scene of a crash is:

> Against the law.

It is against the law to leave the scene of a crash that causes property damage, injury, or death. Drivers involved in such an accident are required to provide their information and supply aid.

85. If you are involved in a crash with an unattended vehicle, you:

> **Must contact the vehicle's owner or leave a note.**

If you are involved in a crash with a vehicle that is unattended, you must make every effort to contact the vehicle's owner and notify law enforcement. If you are not able to find the owner, you can leave a note with your name, contact information, and license plate number.

86. If you pass a school bus that is stopped to drop off or pick up children, you will:

> **Be fined at least \$165.**

Drivers must come to a complete stop when approaching a school bus that is stopped with its lights flashing. Failure to stop until the lights stop flashing will result in a fine of at least \$165. Passing a bus on the side where its door is located will result in a fine of at least \$265. Additional penalties will apply.

87. If you cause injury while passing a school bus that is stopped to drop off or pick up children, you will:

> **Be fined \$1,500.**

Drivers must come to a complete stop when approaching a school bus that is stopped with its lights flashing. Causing an injury when passing a stopped school bus will result in a fine of \$1,500. Additional penalties, such as license suspension and required community service, will apply.

88. Tailgating other drivers (driving too closely to their rear bumper):

> **Can frustrate other drivers and make them angry.**

Tailgating is a common behavior that can lead to aggressive driving, and so it should be avoided. Drivers may face legal consequences for driving unsafely.

89. Driving under the influence of any medication which impairs your driving is permitted:

> **Under no circumstances.**

It is illegal to drive under the influence of any substance that impairs your ability to drive safely. This includes alcohol, prescription medications, over-the-counter medications, and illegal drugs.

90. A solid yellow line next to a broken yellow line means that vehicles:

> **Next to the broken line may pass.**

Yellow lines separate lanes of traffic moving in opposite directions. A broken yellow line next to your driving lane means that you may pass.

91. You want to park uphill on a two-way road and there is no curb. Which direction do you turn your front wheels?

> **Right, toward the side of the road**

When parking either uphill or downhill on a road that has no curb, you should turn your wheels so that the vehicle will roll away from the center of the road if the brakes fail.

92. You are involved in a minor collision at an intersection. There are no injuries and there is very little vehicle damage. You should:

> **Move your vehicle out of the traffic lane, if possible.**

After a collision, if no one has been injured or killed and you can safely do so, you should move your vehicle out of the traffic lane.

93. You are driving on the freeway behind a large truck. You should drive:

> **Farther behind the truck than you would if following a passenger vehicle.**

It is necessary to follow farther behind a large truck than you would if following a passenger vehicle because trucks have larger blind spots.

94. You must yield to a pedestrian using a white cane or guide dog:

> At all times.

Pedestrians who use guide dogs or white canes (with or without a red tip) must be given the right-of-way at all times.

95. To see vehicles in your blind spots, you should check:

> Over your shoulders.

By definition, blind spots are areas that cannot be seen using your mirrors. To check your blind spots, you should look over your shoulders.

96. You are on the freeway and traffic is merging into your lane. You should:

> Make room for the merging traffic, if possible.

When traffic permits, you should make room to allow vehicles to merge into your lane.

97. Extra space in front of a large truck is needed for:

> The truck driver to stop the vehicle.

Because they are larger, trucks take longer to stop than cars traveling at the same speed. Other drivers should not pull in front of a truck and then slow down or stop.

98. When passing another vehicle, it is safe to return to your lane if you:

> See the vehicle's headlights in your rearview mirror.

Before returning to your original lane after passing, you must make sure you are not dangerously close to the vehicle you have just passed. When you can see both of the vehicle's headlights in your rearview mirror, you may have enough room to return to the lane.

99. If you see orange construction signs and cones on a freeway, you must:

- > **Be prepared for workers and equipment ahead.**

As you enter a work zone, signs and message boards will warn you of workers, slow-moving equipment, and/or closed lanes ahead. You should reduce your speed and be prepared to slow down or stop.

100. When you are merging onto the freeway, you should be driving:

- > **At or near the speed of traffic on the freeway.**

When merging onto a freeway, you should enter at or near the speed of traffic.

101. If you plan to pass another vehicle, you should:

- > **Not assume the other driver will make space for you to return to your lane.**

Even when you signal, you should not assume that the space you want to occupy is free or that other drivers will give you the right-of-way.

102. A large truck is ahead of you and is turning right onto a street with two lanes in each direction. The truck:

- > **May have to swing wide to complete the right turn.**

When a vehicle makes a turn, the rear wheels follow a shorter path than the front wheels. The longer the vehicle, the bigger the difference between the paths of the front and rear wheels. Therefore, long trucks often have to swing wide to complete a right turn.

103. Always stop before crossing railroad tracks when:

- > **There isn't room on the other side for you to completely cross the tracks.**

Expect a train on any track, at any time, traveling in either direction. If you need to stop after crossing the tracks, wait until you can completely cross the tracks before proceeding. Make sure your vehicle clears the tracks before you stop.

104. There is no crosswalk and you see a pedestrian crossing your lane ahead. You should:

- > **Stop and let the pedestrian finish crossing the street.**

At an intersection where traffic is not controlled by traffic signal lights, drivers are required to yield the right-of-way to pedestrians within any crosswalk, marked or unmarked. Even if there is no crosswalk, yield to the pedestrian.

105. You should use your horn when:

- > **It may help prevent a collision.**

Only use your horn when it is necessary to avoid collisions. Do not use your horn if a driver or bicyclist is moving slowly and you want him or her to drive faster or get out of your way.

106. Allow extra space in front of your vehicle when following a:

- > **Motorcycle.**

Allow for extra space when driving behind a motorcycle. Motorcycles can stop more quickly than other vehicles can and you must have adequate room to stop if the motorcyclist brakes or falls off. Also, remember that motorcycles are difficult to see at night because they only have one tail light.

107. You must show proof of insurance to law enforcement:

- > **If you are involved in a collision or stopped for a citation.**

You must have evidence of financial responsibility, such as proof of insurance, with you whenever you drive. You must always show proof of insurance and your license to an officer upon request after a traffic stop or collision.

108. You want to turn left at an upcoming corner. Yield the right-of-way to:

- > **All approaching vehicles.**

When making a left turn, you must yield to pedestrians, bicyclists, or other vehicles moving on their green light.

109. Before you change lanes, you should check your mirrors and:

> Glance over your shoulder.

Before changing lanes, it is very important to check behind you. You should look over your shoulder to ensure that you are not getting in the way of vehicles in the lane you want to enter. Before changing lanes, you should also ensure that no drivers are attempting to drive into the same spot from a different lane.

110. You want to park downhill on a two-way road and there is no curb. Which way do you turn your front wheels?

> Right, toward the side of the road

When parking facing downhill on a road with or without a curb, or when facing uphill on a road without a curb, turn your front wheels toward the edge of the road so your vehicle will roll away from traffic if the brakes fail. However, when parking uphill on a road with a curb, turn your wheels toward the center of the road so the vehicle will roll into the curb if the brakes fail.

111. You should not start across an intersection if you know you will block the intersection when the light turns red:

> Under any circumstances.

Even if the signal is green, you must not enter an intersection unless you can get completely across before the light turns red. If you block the intersection, you can be cited.

112. A pedestrian starts to cross the street after the "Don't Walk" signal begins to flash. The pedestrian is in the middle of the street when your signal light changes to green. You should:

> Wait until the pedestrian crosses the street before proceeding.

At a green light, you must give the right-of-way to any vehicle, bicyclist, or pedestrian in the intersection. If a pedestrian begins crossing the street after the traffic signal light starts flashing, wait until they have crossed the street before proceeding.

113. A red arrow pointing to the right on a traffic light means you may:

- > **Not turn in that direction until the light turns green.**

A red arrow means "stop." You must remain stopped until a green light or green arrow appears. Do not turn against a red arrow.

114. An orange and red triangular sign on a vehicle always means:

- > **Slow-moving vehicle.**

Slow-moving vehicles, such as farm tractors, road maintenance vehicles, and animal-drawn carts, display an orange and red triangle on the back.

115. You must yield the right-of-way to an emergency vehicle that is using its siren and flashing lights by:

- > **Driving as closely to the right edge of the road as possible and stopping.**

You must yield the right-of-way to any emergency vehicle that is using its siren and flashing lights. Do this by driving to the right edge of the road and stopping, taking care not to stop in an intersection. You may move again after the emergency vehicle has passed.

116. When a school bus is stopped on the road ahead to load or unload children, you must:

- > **Come to a complete stop until the red lights stop flashing and the stop arm is withdrawn.**

When a school bus is stopped on the road ahead with its lights flashing and its stop arm extended, you must come to a complete stop and wait to proceed until the lights have stopped flashing and the stop arm is withdrawn. Even after the bus begins to move again, do not proceed until you are sure there are no children crossing the road ahead of you.

117. You can drive off the road to pass another vehicle:

- > **Under no circumstances.**

You may never drive off the paved or main-traveled portion of the road and onto the shoulder to pass another vehicle.

118. On a freeway, you should look farther ahead than you would on a city street:

> **In order to see potential hazards early.**

On the freeway, be ready for changes in traffic conditions. Watch for signals from other drivers. Expect merging vehicles at on-ramps and interchanges and be prepared for rapid changes in road conditions and traffic flow.

119. When should you yield your legal right-of-way?

> **Whenever it helps prevent collisions.**

Never assume other drivers will give you the right-of-way. Yield your right-of-way whenever it helps prevent collisions.

120. While driving at night, a vehicle coming toward you has its high beams on, making it hard for you to see the road ahead. You should:

> **Look ahead toward the right edge of your lane.**

If an oncoming driver fails to dim their high beams, you should avoid looking directly at the headlights. Instead, look toward the right edge of your lane and watch the oncoming vehicle out of the corner of your eye.

121. You should increase the distance between your vehicle and the vehicle ahead when you:

> **Are being tailgated by another driver.**

When being tailgated, create extra space in front of your vehicle and do not brake suddenly. Slow down gradually or merge into another lane to prevent a collision with the tailgater.

122. Check your rearview mirrors:

> **Often to see how traffic is moving behind you.**

When driving, do not develop a fixed stare. Frequently check your rearview mirrors so you know the positions of vehicles near you.

123. If your vehicle starts to lose traction because of water on the road, you should:

> **Slow down gradually and not apply the brakes.**

When driving in heavy rain at speeds as low as 30 mph, your tires may lose all contact with the road and instead ride up on a layer of water above the surface of the road. This is called "hydroplaning." If your vehicle starts to hydroplane, slow down gradually and do not apply the brakes.

124. You are crossing an intersection and an emergency vehicle is approaching while using its siren and flashing lights. You should:

> **Continue through the intersection, pull to the right, and stop.**

If you are in an intersection when you see an emergency vehicle approaching while using its flashing lights and/or siren, continue through the intersection and then drive to the right and stop. You must yield the right-of-way to any police vehicle, fire engine, ambulance, or other emergency vehicle using a siren or flashing lights.

125. If a green arrow turns into a solid green light, you:

> **May still turn, but you must yield to oncoming traffic.**

If a green arrow turns into a solid green light, you may still turn in the direction that the arrow was pointing but you must first yield to pedestrians and oncoming traffic.

126. You may cross solid yellow lines:

> **When making turns.**

As a general rule, broken traffic lines may be crossed but solid lines may not. Solid yellow lines may be crossed only when the driver is making a turn.

127. When you drive through an area where children are playing, you should expect them:

> **To run out in front of you without looking.**

You should always reduce your speed and use extra caution when children are in the vicinity. They may fail to understand the danger and may run out in front of you without looking.

128. If you stop at a railroad crossing with more than one track:

- > **Wait to proceed until you have a clear view of all tracks.**

If you are stopped at a railroad crossing with more than one track, do not start moving as soon as a train passes. Wait until you have a clear view down all tracks before you start across. Even where there is only one track, do not start across immediately after a train passes; check again for another train that may be approaching.

129. While backing, you should:

- > **Turn your head and look through the rear window.**

When intending to back up, always check behind your vehicle before getting in. Children and small objects are difficult to see from the driver's seat. While backing, turn your head so you can see through the rear window. Do not depend only on your mirrors or sensors.

130. To help prevent crashes, you should:

- > **Communicate with other road users.**

Crashes often happen because one driver does something that other road users are not expecting. You should communicate with other motorists, bicyclists, and pedestrians by doing things like signaling when slowing down, stopping, or changing direction. Use your emergency signals or horn when appropriate.

131. If you begin to feel tired while driving, the best thing to do is to:

- > **Stop driving.**

Being fatigued while driving is similar in danger to driving under the influence of alcohol. If you begin to feel tired while driving, the best thing to do is to stop driving.

132. If another driver cuts you off in traffic, you should:

- > **Let it go.**

To avoid the dangers of road rage, you should never take it personally if another driver cuts you off in traffic. Just let it go and continue driving safely.

133. To pass a slower-moving vehicle on a two-lane, two-way road, you must:

- > **Use the lane that belongs to oncoming traffic.**

Passing on a two-lane, two-way road requires good judgment because you must use the lane belonging to oncoming traffic to complete your pass. Only pass if you may safely and legally do so.

134. The most important thing to remember about speed management and curves is that you must:

- > **Slow down before you enter the curve.**

The most important thing to remember about driving in curves is that your vehicle's inertia may make it difficult to turn. To maintain control, it is essential that you slow down before entering the curve.

135. To prepare for anything coming up on the road ahead, you should:

- > **Continually scan the entire road and all roadsides.**

Your ability to handle dangerous traffic situations depends largely on searching for and identifying problems before meeting them. Looking far ahead of your vehicle does not mean you should simply stare at the center of the road. You need to continually scan the entire road, including the sides of the road.

136. What does alcohol do to your driving skills and judgement?

- > **It harms both driving skills and judgement.**

Alcohol negatively affects many skills needed for safe driving, including your reaction time and ability to see clearly. It can also harm your judgment of speed and distance, lower your inhibitions, and make you more prone to taking chances.

137. What is the only way to reduce your blood alcohol concentration (BAC)?

- > **Allow your body time to get rid of the alcohol.**

The only method that effectively reduces your BAC is to not drink alcohol for a period of time. Coffee, exercise, and cold showers cannot reduce your BAC or change the effects of alcohol. They can help you remain awake, but they cannot change your BAC or make you sober.

138. You want to back out of your driveway. You see children playing nearby. Before you start to move your car, you should:

- > **Walk to the back of the car to be sure the way is clear.**

When you back up a vehicle, look through your back window for pedestrians and other obstacles. Do not rely only on your mirrors, especially when children are near. Before you back into or out of a driveway, get out of the vehicle and check behind your vehicle.

139. A driver should be extra alert to motorcyclists, bicyclists, and pedestrians because:

- > **They're difficult to see in traffic.**

In many collisions with motorcycles, bicycles, and pedestrians, drivers reported that they were looking but still did not see the smaller vehicle or pedestrian. These can be more difficult to spot in traffic than passenger vehicles because they are smaller, may move faster, and have less noticeable lighting. To prevent collisions with these smaller and less protected road users, drivers should always be alert to the presence of motorcycles, bikes, and pedestrians.

140. At an intersection with a yield sign, you should:

- > **Slow down and yield the right-of-way to other traffic.**

A yield sign means that you must slow down and yield the right-of-way to traffic in the intersection or roadway you are entering.

141. When parking uphill next to a curb, set the parking brake and:

- > **Turn your steering wheel away from the curb.**

When parking facing uphill on a street that has a curb, set your parking brake and turn your steering wheel away from the curb. This way, if your vehicle starts to roll, it will roll into the curb.

142. While driving on a two-lane road without bicycle lanes, you encounter a bicyclist traveling in the same direction. What is the safest way to pass the bicyclist?

> Slow down and wait until there is no traffic approaching, then pass the bicyclist while leaving him or her sufficient space.

You should pass a bicyclist the same way you would pass any other vehicle, but not so fast or close to them that you throw debris in their face or blow them around with the draft of air from your vehicle. Allow at least 3 feet of space between your side mirror and the bicyclist, or at least 5 feet on higher speed roads or when there is a group of bicyclists. Honking unnecessarily may startle riders and make them more likely to crash.

143. After stopping for a school bus that is unloading children:

> Watch for children walking along the side of the road.

After stopping for a school bus that has its stop arm extended and its lights flashing, watch for children walking along the side of the road. You should always drive with caution when driving near children.

144. When driving in fog, rain, or snow, use:

> Low beams.

Low beam headlights should be used in fog, rain, and snow. The light from high beams will reflect back to the driver under these weather conditions, causing a glare that will make it difficult to see ahead.

145. When driving at night, you should:

> Increase your following distance.

Increase your following distance when it is difficult to see due to darkness. Use headlights to increase visibility, following the rules for proper use of high beams and low beams. Avoid looking directly at the headlights of an oncoming vehicle to avoid being blinded by the glare.

146. If you find yourself in a skid:

> Stay off the brakes.

If your vehicle begins to skid, do not use the brakes. Braking could make the skid worse.

147. In rainy weather, you should be most careful when turning or stopping:

> During the first half hour of rain.

You should be extra careful when turning and stopping during the first half hour of rain. At this point, the oil from cars has not yet washed off the pavement and could be forming a slippery mixture with the rain.

148. Another driver is trying to pass your car. You should:

> Check for oncoming traffic and adjust your speed to allow safe passing.

Keep right when another driver begins to pass you on the left. Check for oncoming traffic and adjust your speed to let the passing vehicle move back into the right lane as easily as possible.

149. If two drivers arrive at the same time to a four-way intersection controlled by stop signs:

> The driver on the right has the right-of-way.

Yield the right-of-way to the driver on your right at a four-way intersection if you both arrive to the intersection at the same time. You may then proceed when it is safe to do so.

150. When passing a row of parked vehicles, you should:

> Be prepared for a person or vehicle to unexpectedly enter your lane.

Keep a space between your vehicle and parked vehicles. A person may step out of a parked vehicle or out from between the parked vehicles without looking. A driver may begin moving their vehicle before realizing you are there.

U.S Traffic Signs

Yield

Drivers must slow down and be prepared to stop, yielding the right-of-way to any pedestrians and cross traffic.

Do Not Enter

Drivers are approaching one-way traffic from the wrong direction and should turn around immediately.

Wrong Way

Drivers are approaching one-way traffic from the wrong direction and should turn around immediately.

Do Not Pass

Passing is unsafe and prohibited in the indicated area.

Pass with Care

Drivers may pass when it is safe to do so.

Keep Right

Drivers are approaching an obstruction and should keep to the right.

Keep Right

Drivers are approaching an obstruction and should keep to the right.

No Bicycles

No bicycles are allowed in the indicated area.

No Pedestrians

No pedestrians are allowed in the indicated area.

No Trucks

The indicated area is not suitable for use by large trucks.

No Left Turn

Drivers may not perform a left turn at the indicated intersection.

No Right Turn

Drivers may not perform a right turn at the indicated intersection.

No U-Turn

Drivers may not perform a U-turn at the indicated location.

No Parking

Parking is prohibited at any location where this sign is posted.

No Parking

Parking is prohibited at any location where this sign is posted.

Limited Parking

Parking is restricted in the indicated location during the posted hours.

Pay Parking

Drivers may park in the indicated location if they pay the required fees and do not exceed the time limit.

Right Turn Only

Traffic in the indicated lane must turn right at the intersection.

Left Turn Only

Traffic in the indicated lane must turn left at the intersection.

Straight Only

Traffic in the indicated lane must continue straight through the intersection.

Straight or Turn

Traffic in the indicated lane may continue straight or turn in the direction of the arrow.

U-Turn Only

Traffic in the indicated lane must complete a U-turn.

Left Lane Must Turn Left

Drivers in the left lane must turn left at the indicated intersection.

Multiple Railroad Tracks

The roadway intersects with a railroad crossing with multiple tracks. Drivers must be sure all tracks are clear before proceeding.

Maximum Speed Limit

This is the maximum speed at which drivers may travel. Drivers must drive at a lower speed if conditions require it.

Maximum and Minimum Speed Limits

Under ideal conditions, drivers may not exceed the maximum posted speed and may not drive slower than the minimum posted speed.

School Zone Speed Limit

During the posted times, or when a warning light is flashing, drivers must follow a school zone's speed limit.

End School Zone

A school zone and its restricted speed limit come to an end.

One-Way Traffic

Traffic on the roadway moves only in the direction indicated by the arrow.

One-Way Traffic

Traffic on the roadway moves only in the direction indicated by the arrow.

No Turn on Red

Drivers may not make a right or left turn when the traffic signal is red.

Left Turn Yield on Green

Drivers may make a left turn when the traffic signal is green, but they must first yield to pedestrians and oncoming traffic.

Speeding Fines Doubled

Fines for moving traffic violations are doubled in the indicated area. This sign is commonly posted in work and school zones.

Slower Traffic Keep Right

Slower-moving traffic should stay in the right lane. The left lane is reserved for faster-moving vehicles to pass slower-moving traffic.

Two-Way Left Turn

Traffic from both directions may use the shared center lane to turn left.

Slow-Moving Vehicle

A vehicle with a reflective orange and red triangle on its rear is a slow-moving vehicle that often travels at speeds slower than 25 mph.

Roundabout

Traffic ahead moves in a counterclockwise direction. Drivers should enter at a low speed and yield to traffic already using the circle.

Reserved Handicap Parking

Indicated parking spaces are reserved for vehicles with the proper license plate or hanging tag registered to a person in the vehicle.

Bicycle Lane

The lane is reserved for bicyclists. Passenger vehicles may only enter a bicycle lane when turning.

High Occupancy Vehicle Lane

The lane is reserved during the posted times for vehicles with the indicated number of occupants.

Restricted Lane Ends

Prior lane restrictions come to an end.

Stop

Drivers must come to a complete stop and yield the right-of-way to pedestrians and cross traffic.

All-Way Stop

Drivers from all directions must come to a complete stop and take turns entering the intersection. Drivers must yield to any pedestrians.

Stop Here on Red

At a stop sign or red traffic signal, drivers must come to a complete stop at the indicated stop line.

Divided Highway

Drivers are entering a divided highway and should keep to the right of the median.

U.S Warning Signs

Sharp Turn to the Left

Drivers should reduce their speed and prepare to turn sharply to the left.

Sharp Turn to the Right

Drivers should reduce their speed and prepare to turn sharply to the right.

Curve to the Left

Drivers should reduce their speed and prepare for the road to curve to the left.

Curve to the Right

Drivers should reduce their speed and prepare for the road to curve to the right.

Reverse Turn

The road ahead turns sharply in one direction and then in the other. Drivers should reduce their speed.

Reverse Curve

The road ahead curves in one direction and then in the other. Drivers should reduce their speed.

Winding Road

The road ahead winds in a series of curves. Drivers should reduce their speed.

Directional Arrow

Drivers should reduce their speed and prepare to turn sharply in the direction indicated by the arrow.

Chevron

Drivers should reduce their speed and prepare to turn sharply in the direction indicated by the chevron.

Road Narrows

The road ahead narrows. Drivers should take care to stay on the traveled portion of the roadway.

Merging Traffic

Drivers should be alert to traffic merging from the right and should make room for merging vehicles.

Added Lane

The road ahead comes together with another road. Drivers do not have to merge but should be aware of additional traffic.

Farm Machinery

The roadway is shared with farm machinery. Drivers should drive with caution and be prepared to slow down.

Horse-Drawn Vehicles

The roadway is shared with horse-drawn vehicles. Drivers should drive with caution and be prepared to slow down.

Cattle Crossing

Farm animals may be crossing the roadway. Drivers should be alert to animals and be prepared to slow down or stop.

Deer Crossing

Deer may be on or near the roadway. Drivers should be alert to animals and be prepared to slow down or stop.

Fire Station

Drivers should watch for fire engines entering the roadway to respond to an emergency.

Lane Ends, Merge Left

The right lane ends ahead. Drivers should merge to the left to stay on the roadway.

Lane Ends, Merge Left

The right lane ends ahead. Drivers should merge to the left to stay on the roadway.

Pedestrian Crossing

Pedestrians may be present in a marked or unmarked crosswalk. Drivers must yield to pedestrians crossing a roadway.

Bicycle Warning

Bicycles may be on or crossing the roadway. Bicycles are considered vehicles and motorists must respect their right to be on the road.

Roundabout

Traffic ahead moves in a counterclockwise direction. Drivers should enter at a low speed and yield to traffic already using the circle.

Slippery When Wet

The road becomes especially slippery under wet conditions. Drivers should reduce their speed and following distance.

No Passing Zone

Passing is unsafe and prohibited in an area marked with this sign.

Traffic Signal Ahead

Drivers should be prepared to respond to a traffic signal on the road ahead.

Stop Ahead

Drivers should be prepared to come to a complete stop at a stop sign on the road ahead.

Yield Ahead

Drivers should be prepared to slow down or stop at a yield sign on the road ahead.

T Intersection

The road ends ahead. Drivers should prepare to stop before turning left or right.

Crossroad

The road meets an intersecting crossroad ahead. Drivers should be alert to entering traffic.

Side Road

The road meets an angled side road ahead. Drivers should be alert to entering traffic.

Side Road

The road meets an intersecting side road ahead. Drivers should be alert to entering traffic.

Y Intersection

Drivers are approaching a fork in the road. They should prepare to slow down or stop before turning left or right.

Pavement Ends

The road surface ahead changes from pavement to gravel or dirt and tires will have less traction.

Pavement Ends

The road surface ahead changes from pavement to gravel or dirt and tires will have less traction.

Traffic Island

There is a traffic island on the roadway and drivers may travel on either side of the obstruction.

Divided Highway Ahead

A divided highway begins ahead. Drivers should keep to the right of the median.

Divided Highway Ends

The divided highway ends ahead. Drivers should keep to the right and be alert to oncoming traffic.

Two-Way Traffic

Lanes travel in two different directions. Drivers should keep to the right and be alert to oncoming traffic.

Exit Speed Limit

Drivers should slow to the posted speed limit once they have entered the freeway's deceleration lane.

Reduced Speed Ahead

The speed limit is reduced on the roadway ahead. Drivers should begin to slow down.

Advisory Speed

An upcoming curve or turn in the road requires a decreased speed. Travel may resume at the normal speed limit after the turn is completed.

Low Shoulder

The shoulder ahead is lower than the main-traveled portion of the road. Drivers should expect a drop if they leave the roadway.

Low Clearance

An overhead structure may be too low for certain vehicles to safely continue on the roadway.

Downhill Slope

The road ahead slopes at a steep grade. Drivers should increase their following distance and decrease their speed.

Fallen Rock

There may be large fallen rocks on the road surface. Drivers should be alert and prepared to safely maneuver around the obstacles.

Drawbridge

The bridge ahead is a drawbridge. Drivers should slow to a stop when told to do so by a sign, signal, or flagger.

Ice on Bridges

Bridges freeze more quickly than the rest of the road. Drivers should use caution when driving on bridges under wet or freezing conditions.

Narrow Bridge

The bridge ahead is more narrow than the preceeding roadway. Drivers should use caution when driving on a narrow bridge.

One-Lane Bridge

The bridge ahead has only one traffic lane. Drivers should be prepared to yield to oncoming traffic.

Bump

There is a sudden bump on the road ahead. Drivers should slow down to avoid losing control of their vehicle.

Dip

There is a sudden dip in the road ahead. Drivers should slow down to avoid losing control of their vehicle.

Grooved Pavement

The road surface has been grooved to improve traction under slippery conditions. Cyclists should use caution.

Dead End

The road ahead comes to an end. Drivers will have to turn around to leave the ending roadway.

School Zone

Drivers are in a school zone and must be alert to children and pedestrians. Drivers should reduce their speed.

School Crossing

Drivers are approaching a school crossing and must be alert to children and pedestrians. Drivers should reduce their speed.

Playground Area

Drivers are near a playground and should be extra alert to children on or near the roadway.

Railroad Crossing

The roadway intersects with railroad tracks. Drivers must yield to all trains and proceed only when it is safe to do so.

Railroad Crossing

The roadway intersects with railroad tracks. Drivers must yield to all trains and proceed only when it is safe to do so.

Railroad Crossing

The roadway intersects with railroad tracks. Drivers must yield to all trains and proceed only when it is safe to do so.

Railroad Crossing

The roadway intersects with railroad tracks. Drivers must yield to all trains and proceed only when it is safe to do so.

Uneven Grade Crossing

The roadway intersects with railroad tracks on an uneven grade. Vehicles with low undercarriages may have difficulty crossing the tracks.

Roadwork Ahead

A work zone is ahead on the roadway. Drivers should proceed with caution and follow all provided directions.

Roadwork Ahead

Roadwork is present for the indicated distance. Drivers should proceed with caution and follow all provided directions.

Shoulder Work

Maintenance is taking place on the shoulder of the road. Drivers should proceed with caution and follow all provided directions.

Flagger Ahead

A flagger is directing traffic through a work zone. Drivers should proceed with caution and follow all provided directions.

Workers Present

Workers are on or near the roadway. Drivers should use extra caution when driving in a work zone where workers are present.

Lane Shift

Usual traffic lanes follow a redirected path in the indicated area. Drivers should travel within the shifted lanes.

Road Closed Ahead

The road ahead is closed due to maintenance. Drivers should not travel on a closed roadway.

Detour

The road is closed due to maintenance and drivers should follow the posted detour.

U.S Other Signs

U.S. Route

Drivers are on a United States numbered route.

Interstate Route

Drivers are on a numbered interstate.

Junction

Drivers are approaching an area where one route meets another.

Food

The exit indicated on the service sign has food options available for drivers leaving the highway.

Lodging

The exit indicated on the service sign has lodging options available for drivers leaving the highway.

Fuel

The exit indicated on the service sign has fuel service options available for drivers leaving the highway. Diesel may also be available.

Diesel

The exit indicated on the service sign has diesel fuel service options available for drivers leaving the highway.

Camping

The exit indicated on the service sign has camping locations available for drivers leaving the highway.

Telephone

The location indicated on the service sign has a telephone available for public use.

Litter Barrel

The location indicated on the service sign has a litter barrel available for public use.

Hospital

There is a hospital at the location indicated on the service sign.

Rest Area

A rest area is located off the highway in the direction of the arrow.

Emergency Notification

If there is an urgent safety issue at a railroad crossing, drivers should call the number on the service sign for assistance.

Handicap-Accessible

The indicated location is designed to be handicap-accessible.

Evacuation Route

Drivers are on a roadway that should be used during an evacuation due to a hurricane or other emergency.

Bus Station

There is a bus station at the location indicated on the sign.

Park

There is a park at the location indicated on the recreation sign.

Playground

There is a playground at the location indicated on the recreation sign.

Wildlife Viewing Area

The location indicated on the recreation sign has a wildlife viewing area available for drivers leaving the highway.

Wildlife Viewing Area

The location indicated on the recreation sign has a wildlife viewing area available for drivers leaving the highway.

STATE PARK
NEXT LEFT

State Park

There is a state park at the location indicated on the recreation sign.

Boat Ramp

There is a boat ramp available at the location indicated on the recreation sign.

Canoe Ramp

There is a canoe ramp available at the location indicated on the recreation sign.

HISTORICAL
MARKER

Historical Marker

There is an area of historical significance at the location indicated on the recreation sign.

Winter Recreational Area

The location indicated on the recreation sign has a winter recreational area available for drivers leaving the highway.

Ski Area

The location indicated on the recreation sign has a ski area available for drivers leaving the highway.

Milepost

The number on a milepost indicates a location on the highway. Mileposts often correlate with exit numbers.

Garfield	25
Taylor	40
Everman	71

Destination Sign

Distances to the listed locations are posted in miles on the right side of the sign.

Guide Sign

Drivers are approaching upcoming exits and should merge into the necessary lanes.

Guide Sign

Drivers can access the posted route by driving in the indicated lane.

Exit

There is a highway exit in the direction of the arrow. Drivers who wish to leave the roadway may signal and merge onto the off-ramp.

Trolley Station

There is a trolley station at the location indicated on the sign.

Airport

There is an airport at the location indicated on the sign.

Bike Route

There is a bike route in the direction of the arrow. Drivers should be alert to bicyclists.

Hiking Trail

There is a hiking trail in the direction of the arrow. Drivers should be alert to pedestrians.

Parking

A parking lot is available at the indicated location.

Practice Test

<https://www.dmv-written-test.com/florida/practice-test-1.html>
